DXpedition News

Nauru - C2 The DXpedition team that activated Desecheo and Navassa in recent years is headed for Nauru Feb. 23-Mar. 2. Randy Rowe NØTG, Ron Oates AA4VK, Bob Stewart KW2P, and Mellish Reef DXpeditioner Murray Adams WA4DAN will pass along more information as it becomes available.

Angola - D2 Kim Bjoern OZ1ACB is now active as **D2EYE**, until December. He runs barefoot into a dipole on 160-10 meters; try 14020, 21020, and 28020 kHz on CW, and 14195 kHz on SSB. The Angolan PTT damaged his rig, and he is limited to 5 kHz steps in frequency selection. If he's listening split, send **exactly** 5 kHz higher. QSL direct to him c/o Tombwa/Nabibe, ADPP, CP 345, Luanda, Angola, with large SAE (it takes **lots** of stamps to make up airmail postage to the US) and US$1.

▪ **T92X** (ex-YU4XA, 4N4XA) is often on 14005± kHz at 22-2400Z, looking for US contacts; QSL to KA9WON. He reports that mail in Bosnia-Herzegovina has been suspended due to the war, but he gets mail via: Mlle. Vlatka-INTERPRETE, c/o ACO-T92X, SP 71076, 00886 Armees, France. He needs US$1-2 or two IRCs to respond directly, but can help with many Bosnia cards.

▪ The **DX Advisory Committee** voted 16-0 **against** a SCDXC proposal to reduce the distance requirements in DXCC Country Criteria Rule 2 to make more DXCC countries. The DXAC also voted 10-6 **against** establishing Honor Rolls for band- and mode-specific DXCCs, such as 80 meters and RTTY. The DXAC felt this would benefit only a few DXers, and jeopardize the current smooth operation of the DXCC desk.

▪ **SSB Net** check-ins: **14227** kHz: (11,21Z) 7J1APM; **14243**: (00Z) STØDX/TY; **14247:** (23Z) TN1AT; **21335**: (14Z) 9K2MU TL8NG ZC4CT ZS9A.

Propagation Watch

Propagation quiz: what do you get when you combine extremely low solar flux and an geomagnetic storm in July? Answer: not much DX. The IARU HF Championship was marred by just such a combination, hampering even the seasonally marginal band conditions.

Solar flux dropped to 80. There were only three sunspots visible, and none was active. The source of the geomagnetic storm was not known; we had forecast quiet conditions.

Looking ahead, we should see a significant increase in solar flux, to at least 125, over the next 10 days. However, there is an increased chance of geomagnetic activity and disturbed conditions later this month.

Meanwhile, aside from lots of E-skip on 6 and 10 meters, 20 and 18 meters provide the bulk of the DX, with a few short, weak openings on 15 meters. Remember that a shortening skip on one band suggests the possibility of an opening in that direction on the next higher band. And don't just tune across that band and listen; send a directional CQ. Signals won't be strong, so listen closely. (Almost anything beats the bedlam on 20!) Good hunting!
